Dadhichi Industrial Training Centre

Dadhichi Industrial Training Center is situated at Vidya-Vihar, Sundargram, Cuttack. It is established during 2005, registered under Dadhichi Educational Trust. It is affiliated to The NCVT, Govt. of India, New Delhi & functions under Director of Technical Education, Orissa and State Council for Technical Education & Vocational Training, Orissa. The objective of the Institution is to produce bonafide Technicians among the unemployed youth to meet the requirement of technical manpower in the state as well as all over India. The Institute has up to date laboratories and workshop with very experienced teachers. The passed out technicians of this ITC get employment all over India, and some of them go for self employment.

The Institute is also supported by some leading industrial houses & eminent personalities to guide the management to match the requirement of the Industries & cope up with the present need.

about us

Courses and Eligibility :

Dadhichi ITC imparts training in different courses given below for Admission during the current academic session.

Name of the Trade	Duration	Entry Qualification
Fitter	2 Yrs.	HSC/CBSE. Pass
Electrician	2 Yrs.	HSC/CBSE. Pass
Electronics Mechanic	2 Yrs.	HSC/CBSE. Pass
Refrigeration & Air-conditioning Technician	2 Yrs	HSC/ CBSE. Pass
Wire man	2 Yrs	8th Pass

The **future** is ready.
are you **excited?**

Fitter :

The activities of this trade cover almost all aspects of Mechanical Engineering like metal cutting, sawing, chiseling and filing etc. to produce a complete job of required accuracy. Further, welding, Turning, Sheet metal works and Black Smiths etc. are also a part of their job. Such technicians have huge demand in almost all heavy, medium and small scale industries. In public sectors also the organizations like SAIL, HAL, NALCO and Indian Railways employ large numbers of fitters to carry on day to day operational & maintenance works.

Electrician :

The Electrician course is designed to cater the needs of Hydroelectricity power generating plants, Thermal Power Plants, transmission and distribution system of Electrical Power to every corner of the Country. Besides, electrical wiring installation, machine maintenance and lighting installation etc. are the job of Electrician. Employment opportunity for this trade is spread over all categories of industries irrespective of their type and size. This trade also has enormous scope for self employment in both urban and rural areas.

Technology
where
BORN

Industrial Visit :

In order to give the students a taste & exposure on the floor training, the Institute conduct industrial visit to different neighboring and outside industries.

Electronics :

This trade is designed to provide man power to industries engaged in manufacture of Electronic Consumer Goods like Television, Audio equipments, A.C. Voltage Stabilizers, Telephone equipments etc. In modern industries all electrical machineries are controlled by electronic systems. Hence this trade is complementary to electrical trades. In this trade the trainee gets all fundamental knowledge of electronic components so that he/she can specialize in the particular area of work where he/she is employed. Our time is rightly called "Electronic era" where every branch of Engineering will be in need of electronic systems for day to day operation & maintenance.

Refrigeration & Air-conditioning Tech.:

Refrigeration is not only confined to domestic refrigerators meant for luxury. It is extensively used in industry, medical science, commerce, railways, air craft and space research etc. There is good demand for service technicians in this field. But very few I.T.Is in both Govt. and Private sectors have this trade. So limited numbers of students pass out in this trade annually and have good chance of employment in Govt. & Private sectors due to short supply of technicians compared to the demand in the market.

Wireman :

Wireman is an electrical engineering vocational trade. The duration of trade is two years. The syllabus for trade mainly comprises topics like how to repair and replace wiring and Electrical systems in houses and factories, prepare the grounding system and connect wiring to the structure, Install wiring, security and fire-protection systems, Install lighting fixtures and troubleshoot electrical systems, Read a variety of meters to check current values & the amount of current being sent or received and like others. Trade is good from job point of view and self-employment as it opens many opportunities in various fields.

Sports & Game :

Students get all facilities for games sports during training period, Inter trade tournament and annual sports are conducted every years

Canteen :

There is good canteen inside the Institute campus for staff & students with reasonable price.

Apprenticeship Training :

ITI passed out candidates are eligible for getting Apprenticeship Training through Zonal Apprentice Advisors appointed by the Govt. of Odisha: The offer of apprenticeship is given according to the Zonal merit list against available vacancy. Besides this DET placement Division having contact with some Industries of neighboring states offer provide apprenticeships training to the students those who are not able to get chance through the Zonal apprenticeship advisor.

Computer Training :

The institute is having a nice computer lab. Free computer training is given to all students during the training period. Special computer courses required for ITI students is conducted on extra payment as recommended by the D.G.E.&T, Govt. of India, New Delhi.

Training & Placement Cell :

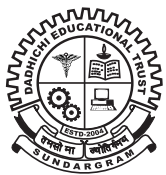

The Institution has a placement cell. The cell extends help to the students who register their name in the cell. Besides off-campus & on-campus interviews are also arranged by different establishments

The Strength :

- Suitable environment for Students.
- Huge work shops with all Machineries, and Equipments, rare else where.
- An well stacked Library.
- A band of duly qualified committed Faculties.
- A Highly qualified Principal with well Experience, an Asset to the Institute.
- Extremely sensitive Management.
- Hostel, Canteen, & Transport facilities.
- Scope for Industrial Interface.
- Specialised Skill Dev. Programmes and Orientation Classes.

LED Bulb Assembling Training

Our ITI trainees receive hands-on training in LED bulb assembling and testing using modern tools and equipment. Students learn PCB fitting, driver connection, soldering techniques, housing assembly, and quality testing. This practical exposure helps trainees develop skills for self-employment, small-scale manufacturing, and industry jobs in the electrical and electronics sector. The training focuses on safety standards, energy efficiency, and real-time production practices.
